

HPC ALLIANCE FOR APPLICATIONS AND SUPERCOMPUTING INNOVATION: THE EUROPE - JAPAN COLLABORATION

ABOUT HANAMI

HANAMI is **strengthening the EU-Japan collaboration around HPC** by gathering key research institutes and high-end supercomputers in one environment to tackle exascale challenges for climate, biomedical and material science. The HANAMI consortium is **led by the French Alternative Energies and Atomic Energy Commission (CEA)** in France and includes **14 European organisations and 10 Japanese institutions**.

ROADMAP FOR THE FUTURE

HANAMI is defining a **sustainable framework for the cooperation between European and Japanese counterparts**, bringing together research organisations, research-supporting organisations, industrial partners, funders, and policymakers and creating a link with other European projects and cooperation initiatives between the regions.

HIGH-LEVEL SYMPOSIUM (HLS)

This is a **landmark event for strengthening research and technological ties between Europe and Japan** in the fast-advancing field of supercomputing. The HLS aims to have leading researchers, policymakers, and stakeholders from both regions together to discuss the future of HPC and the role of international collaboration in addressing global challenges.
