

HANAMI

EU-Japan Alliance in HPC

SHAPING THE FUTURE OF EU-JAPAN HPC COLLABORATION

ABOUT HANAMI

HANAMI connects European and Japanese researchers through a shared HPC ecosystem, enabling joint research, knowledge exchange and long-term technological cooperation.

HIGH-LEVEL SYMPOSIUM 2026

2–5 November · Kittilä, Finland

Bringing together researchers, HPC centres, policymakers and strategic stakeholders to shape the next phase of EU-Japan supercomputing cooperation.

Discover the symposium:
hanami-project.com/events

TRAINING THE NEXT GENERATION

HANAMI connects European and Japanese researchers through a shared HPC ecosystem, fostering collaboration and knowledge exchange in climate and weather modeling, materials science and biomedical sciences.

HANAMI SUSTAINABILITY ROADMAP

A durable EU-Japan collaboration model that continues beyond the lifetime of the HANAMI project.

Connect: Bring together the EU-Japan HPC research community.

Enable: Open access to infrastructures, expertise and shared services.

Scale: Expand joint projects, training and scientific exchange.

Sustain: Create the governance and cooperation mechanisms needed for long-term impact.

Explore the roadmap:

Meet some of the **PhD students and postdoctoral researchers** advancing HANAMI's research across Europe and Japan:

MARTA ALERANY
Climate and
Weather Modeling

LEO ARRIOLA
Climate and
Weather Modeling

COSTANZA BORGHESI
Materials Science
